

# User Journey Map

## Alien Gallery Webpage

### ACTIONS

The app's main screen, presenting "News Related" and "Searching" options

"News Related" or "Searching" screens.

"Alien Information" or "World Map."

"Comment Section" after exploring a location's description.

### TOUCHPOINTS

Users decide whether to explore news about aliens or actively search for information

Users browse alien-related news, perform searches, or view a list of results and images/videos in the "Gallery."

Users review profiles, examine map locations, and view related images and videos.

Users contribute to discussions, leave comments, or interact with other users' feedback.

### EMOTIONS

Curiosity and intrigue drive users to explore either news updates or search functionalities.

Satisfaction in discovering new content or frustration if search results are not as expected.

Excitement or wonder as users gain detailed insights into alien profiles and global phenomena.

A sense of participation, connection, or even disagreement as users engage with community opinions.
